

Regeneration Ukraine International Networking Platform

Why we are here

Regeneration Ukraine is an open international networking and co-creating platform devoted to support Ukrainian people and country during war and post war recovery through providing sustainable solutions aimed at food, energy, water and social security for local communities in Ukraine as well as biodiversity restoration of Ukrainian ecosystems.

The framework for Regeneration Ukraine Platform is provided in descending priority by [Sustainable Development Goals](#), [European Green Deal](#) and [New European Bauhaus](#)

Regeneration Ukraine is not associated with any military issues – it is purely a humanitarian project driven by universal human values in support of Ukraine. However Regeneration Ukraine Platform and its members clearly express their position AGAINST the Russian invasion as something that violates peace, justice and human values and brings suffering to people and destruction to ecosystem.

Toolbox

- Regeneration Agriculture
- Circular local economics
- Permaculture
- Ecological Engineering
- Holistic management
- Social entrepreneurship

Mission: provide sustainable solutions aimed at food, energy, water and social security for local communities in Ukraine as well as biodiversity restoration of Ukrainian ecosystems
